

Preparation for Demonstration Sessions as Part of the Future Clinical Record RFI

As part of the **National EHR Initiative** and the **Request for Information (RFI) No. 138-2026 for defining the future clinical record framework for the Israeli Healthcare system**, we are preparing for online demonstration sessions following receipt and review of the RFI responses.

The sessions are intended to deepen our understanding of existing, operational EHR solutions presented by respondents as part of their RFI responses. **The EHR provider will present and demonstrate the existing capabilities of its clinical EHR solution and respond to questions during the session.**

The sessions are currently planned to take place online on **December 14-17, 2026**, between **16:00-20:30 Israel time**, in two time slots each day: 16:00-18:00 and 18:30-20:30. **The dates and times are indicative and may be subject to change based on final coordination.**

Each session will last approximately two hours, including approximately one hour for the respondent's presentation and demonstration of the EHR solution, followed by approximately one hour for questions, clarifications, and discussion.

Respondents invited to participate will receive in advance a common set of focus areas and specified use cases for the demonstration. In addition, respondent-specific questions regarding the EHR solution may be provided based on the RFI response submitted. Following review of the RFI responses, where **a demonstration session with a particular respondent is considered relevant to the ongoing learning process**, the respondent will be contacted separately to coordinate the date and time of the session. This notice is provided for advance planning purposes only. It does not constitute an invitation to a demonstration session, does not guarantee that any particular respondent will be invited, and does not create any commitment regarding a future procurement process. The deadline for submitting RFI responses is **October 20, 2026**. The RFI documents and published updates are available on the official website: [\[official RFI link\]](#). In the event of any inconsistency between this notice and the documents published on the official website, the latter shall prevail.
