Request for information (RFI)
Provision of information monitoring services on networks for ministries- FAQ

- 1) Government Procurement Administration (hereinafter- the "**Initiator**" or the "**State**") issued a request for information regarding the provision of information monitoring services on networks for ministries (hereinafter- the "**Request**").
- 2) Pursuant to the granted authority under Section 7.4 of the request, the initiator's answers to the obtained questions regarding this request are attached following. This response document is an integral part of the request, for any purpose or intention.
- 3) The rest of the request's documents will not be modified.

Sincerely,
Gabay Yariv

<u>No.</u>	<u>Section no. of the request</u>	<u>Question</u>	<u>Answer</u>
1	5.2	What is the meaning of monitoring PDF files in section 5.2?	The section doesn't refer to monitoring capabilities, but to scanning capabilities. The meaning is that the system will be able to scan files in PDF format.
2	6.6	What is the meaning of patterns analysis and natural language processing?	Morfologiot capabilities that enable detection of synonyms, errors, biases, basic syntax, etc.
3	6.7	What is the meaning of idea discourse's integration capabilities?	The ability to identify the main idea of the text using words/ expressions/ defined sentences.
4	6.9	What is the meaning of video processing capabilities? Do you mean manual or automated capabilities?	The intention is to vocal information processing and not to graphic information processing. In any case, the reference is to the automated capabilities relating both video and audio.
5	Table row no.32	What is the meaning of data import capabilities in table row no.32?	To check whether the system is able to import data from the external environment in order to process it. For example does the system able to receive an Excel file from an external source and process it internally, within the system.
