Office Software - Spectra Precision Survey Office Complete

12,120 ש"ח

GNSS post processing	Ability to process all available signals, including L1 and L2 GPS and GLONASS data
Improved processing engine	Fast and reliable baseline processing
Advanced post-processing controls	Ability to edit post processing controls to work with problem data
Modern user interface	Consistent interface between all new Spectra Precision office software. Easy to learn and use.
Modular software design	RTK users can select a module that does not require a dongle license.
	L1 GPS users can select the "basic" module without the need to set dual frequency controls.
	L1/L2 GPS + GLONASS users can select the "complete" module.
Internet download	More automated download of reference station data.
HTML reports	Ability to quickly generate HTML reports. Easy to transfer into EXCEL, or copy to other reports.
Points spreadsheet	Ability to quickly sort, search and edit the points database.
Vector spreadsheet	Ability to quickly sort and search all vectors in the project. Also provides the ability to quickly edit antenna details.
Advanced COGO	Ability to compute COGO in the office software.

\*המחיר לא כולל מע"מ

בכבוד רב,

אינג. סלאמה עואודה
