BERNESE.5.0      אוריאל

Dear Dr. Yakov Tuchin,

thank you for your reply and your attached copies.

Due to your enclosed information and our records, the things looks now clear. That means, in 2000 the Survey of Israel updated their existing Bernese commercial Single Workstation license for Windows to a commercial Multi Workstation license (site license) for UNIX/Linux V4.2.

That means, your institution, the Survey of Israel is owner of a Bernese V4.2 Multi Workstation License (entitled to install the software on as many workstations inside of your institution as desired).

Upgrade price for your V4.2 Multi Workstation License to a version 5.0

Multi Workstation License is CHF 4,500.-

- > Anyway we need dual Workstation license V5.0 and its exact price in
- > our situation .

The upgrade price of your actual V4.2 license to a Dual Workstation license V5.0 is CHF 4,000.- . But In this case you will downgrade your existing site license to a dual license (Entitled to install the software only on two workstations at the same time.). However, I think this is not necessarily recommended, if you want to install Bernese on more than two workstations.

As attached you will find the appropriate upgrade order form for your possibly order.

I hope this information will help.

Best regards,

Peter Walser
