RE : PYRO-CHEM KKII RESTAURANT SYSTEM IN ISRAEL

Tyco Fire Protection Products is the owner and supplier of a number of brands, covering our product portfolio. These brands include Pyro-Chem.

In line with our operating procedures and given the important use of our products in Fire Fighting applications, our products are offered only through approved and authorized partners, who are trained to fully understand the design, installation, service and maintenance requirements of the products and the systems that use these products. This is designed to ensure their proper functioning and application of the products to meet the requirements of applicable standards such as NFPA 17A and NFPA 96.

We confirm that we have a long standing distribution agreement with Alpine Systems.

We do not sell the Pyro-Chem KKII Restaurant System to any other company in Israel.

Should you wish us to visit to discuss this further please do not hesitate to contact the undersigned.

Yours Faithfully,

Alan Elder
Fellow, Engineered Systems
