

Request for Information 100/19 – Systems for photographing and monitoring smoke and air polluting emissions above and outside emission sources

The Ministry for Environmental Protection (hereinafter: the “Ministry”) is hereby appealing to the public with a request for information regarding systems for photographing and monitoring smoke and air polluting emissions above and outside emission sources in industrial compounds.

The request refers to systems for identifying and photographing smoke as defined in the Abatement of Environmental Nuisances Law, 1961, and measuring various pollutants, including aromatic hydrocarbons, above petrochemical plants/installations or outside their fences as well as the method of measurement and operation required.

The system will include:

1. Equipment carrying device (such as a drone, vehicle, trailer etc.).
2. Smoke photography and pollutant monitoring equipment.
3. Supporting meteorological system.
4. Real-time data processing system.
5. System for recording and transmitting data to the regulator.

The request documents can be downloaded from the Purchasing Manager website at www.mr.gov.il.

Final date for submitting information Thursday 28.02.2019 by 13:00 in the Ministry for Environmental Protection tender box at 5 Kanfei Nesharim St. Jerusalem, ground floor.
