Additional Notes to Reader

When shipping goods internationally; palletization must meet international standards; if wood pallets are used, they may have to be treated to ensure there are no pest infestation problems.

Camera calibration is performed by United States Geological Survey (USGS). Details relating to their services and fees can be found on their web page.

http://calval.cr.usgs.gov/calval_osl/opticalservfees/

Our preference is to ship the aerial survey cameras to USGS by FedEx either International Priority Freight (overnight) or International Economy Freight (generally two day service). Air freight shipping costs from our location to USGS are currently in the \$2650.00 to \$2850.00 price range. If additional insurance is required; that would be an additional cost. Specific shipping charges can be confirmed when exact dimensions are known.

Funds will be invoiced in US Dollars, payable by Electronic Funds Transfer when work has been completed and goods are ready to be shipped from our location.
