June 28th 2021

To Whom It May Concern:

This letter confirms that Nintex, the maker of K2 software, has an exclusive Distributor relationship with FocusIS as distributor of K2 software in the Israel region for 2021. This includes K2 Five, K2 Smartforms, K2 blackpearl and other K2 branded products available via Nintex. There are other partners who can provide other Nintex products, not K2, in Israel.

Partners and Distributors are independent third parties who are authorized to resell K2 licenses in their agreed to territories. Partners and Distributors not only resell licenses but may also provide services required around those products

Regards,

A handwritten signature in black ink, appearing to read 'P. Blackwell', with a long horizontal flourish extending to the right.
