Authorization letter - Declaration of sole distributorship  
No calibration requirement statement

- **Declaration of sole distributorship TAMAR – Laboratory Supplies Ltd.**

Bio Molecular Systems Pty. Ltd. located at Unit 5/3 Northward St, in Upper Coomera QLD 4209, Australia with Chamber of Commerce number ABN: 55 141 467 754 hereby declares that TAMAR – Laboratory Supplies Ltd. based in Israel, with address: P.O.B 40275 Mevaseret Zion 9140102 is the sole reseller and our official representative for Israel for all product items manufactured by Bio Molecular Systems Pty. Ltd. BMS instruments manufactured under OEM are excluded from this distributorship.

**No calibration requirement statement**

A thermal sensor is embedded in the spinning rotor which measures tube temperature directly. This sensor does not drift over time so there is no need for it to be recalibrated. For those customers who require an annual validation report, we have a Temperature Verification System.

Mic's optical system has a fixed optical path and no moving parts. This means there is never any need for optical alignment or calibration. Because every sample spins past the same detector there is no reference dye or crosstalk compensation required either.

Kind regards,

Albert Wijngaard
